

Proquinsa

PRODUCTOS QUÍMICOS INTERNACIONALES S.A.

Corporate presentation

INTRODUCTION

Productos Químicos Internacionales S.A., is a Spanish company established in 1984 with headquarters in Malaga, in the South of Europe. At Proquinsa, we have the necessary infrastructure for storage, transportation and distribution of raw materials for the industry at a national and international scale.

Our knowledge of the particularities of the industrial environment, as well as the professionalism and concern for improvement of our technical-sales team and the producers with whom we work, mean that we can offer solutions adapted to the needs of each client.

We have a structure and experience that allow us to provide exceptional service to our clients, with national and international coverage, guaranteeing the uninterrupted supply of raw materials for various sectors.

Our history and prestige in the sector satisfies and commits us to the continuous search for top quality raw materials and environmentally friendly products.

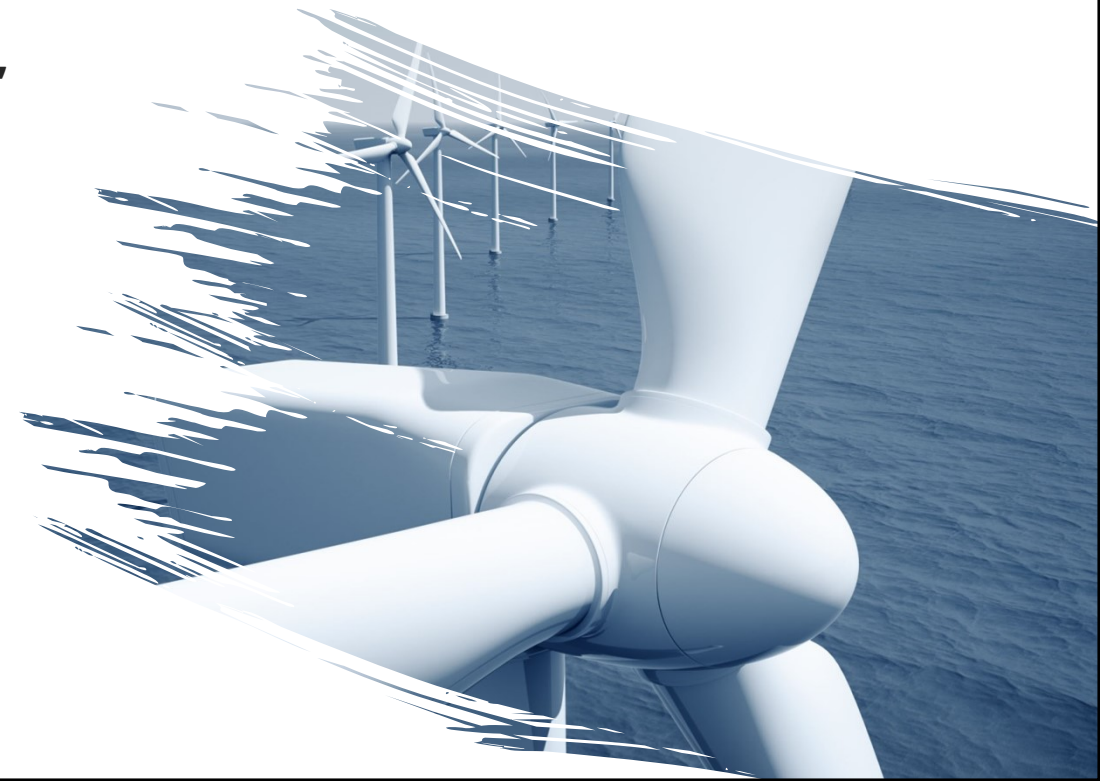

MAIN DIVISIONS

And featured products

COMPOSITES

- **Unsaturated polyester, vinyl ester, epoxy and phenolic resins.**
- **Technical reinforcements of fiberglass, carbon, aramid, polyester and polypropylene.**
- **Fiberglass reinforcements:** chopped strand mat, surface veils, direct roving, spray up roving, woven roving, multiaxial, mat-fabric complexes and other combinations of materials.
- **Methyl ethyl ketone peroxide, methyl isobutyl ketone, acetylacetone and benzoyl.**
- **Gelcoats, pigmented pastes and putties.**
- **Others: accelerants, auxiliary products for molds, thixotropic additives, solvents, paraffin and tools.**

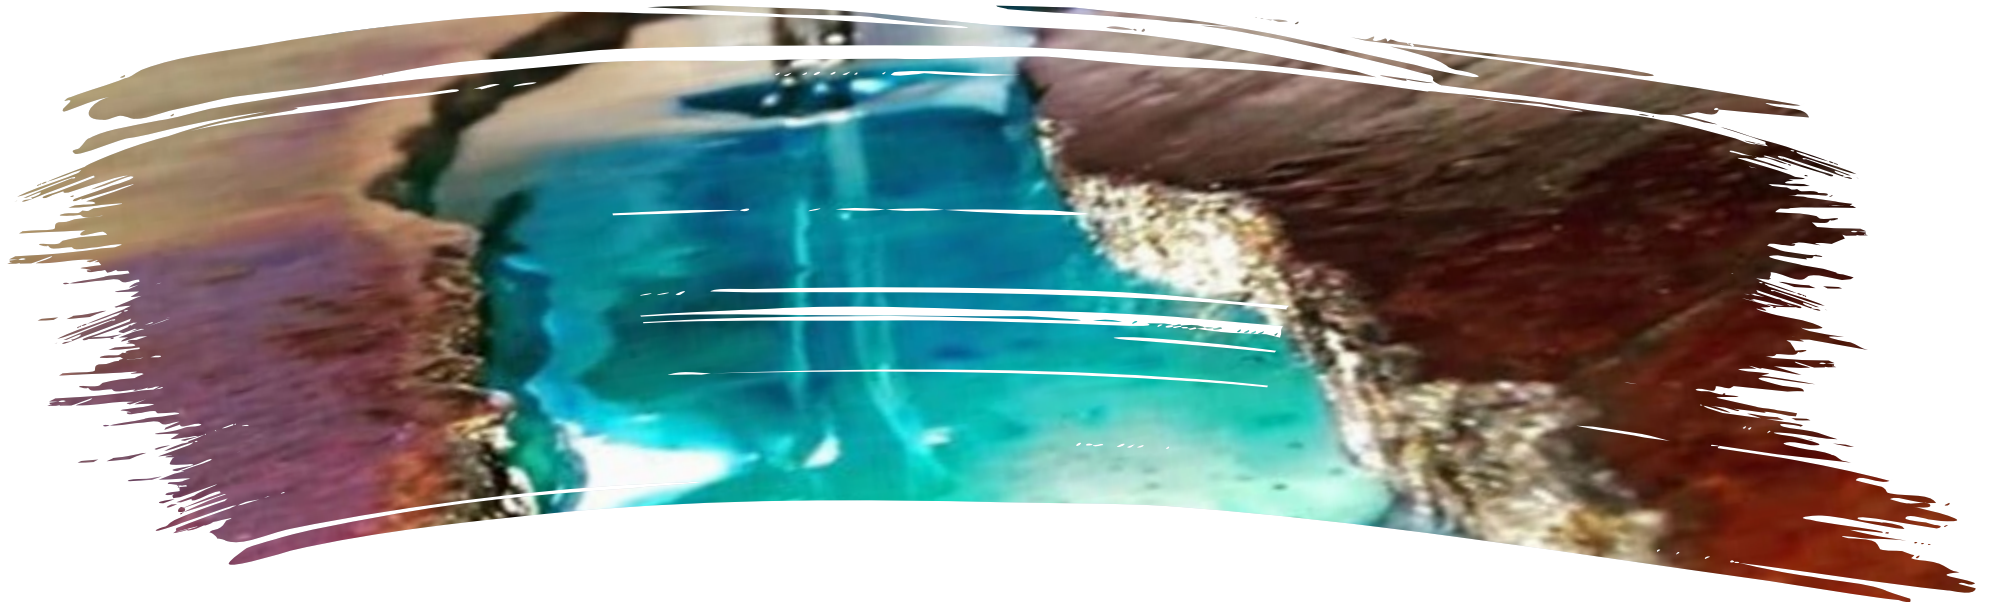

POLYURETHANE

- **Polyols** of different densities for thermal insulation, applied “in situ” by spraying or casting.
- **Industrial polyols** to manufacture flexible, viscoelastic, rigid, semi-rigid, integral and RIM foam.
- **MDI** (Diphenylmethane Diisocyanate) and its different modified forms: **Polymeric MDI** (PMDI), **Monomeric MDI** (MMDI) and **Modified MDI**.
- **Polyester and polyether based polyols** to formulate polyurethane foams. Recubrimientos y adhesivos para poliuretano.
- Others: **pigments, release agents and solvents**.

EPOXI

- Raw materials and systems used in the PBA-based epoxy resins and hardeners industry.
- Systems especially indicated for coating, adhesives and dielectrics.
- UV systems, monomers, oligomers and photoinitiators.
- Cyclic anhydrides such as MTHPA, THPA, NA, MHHPA and other epoxy hardeners.

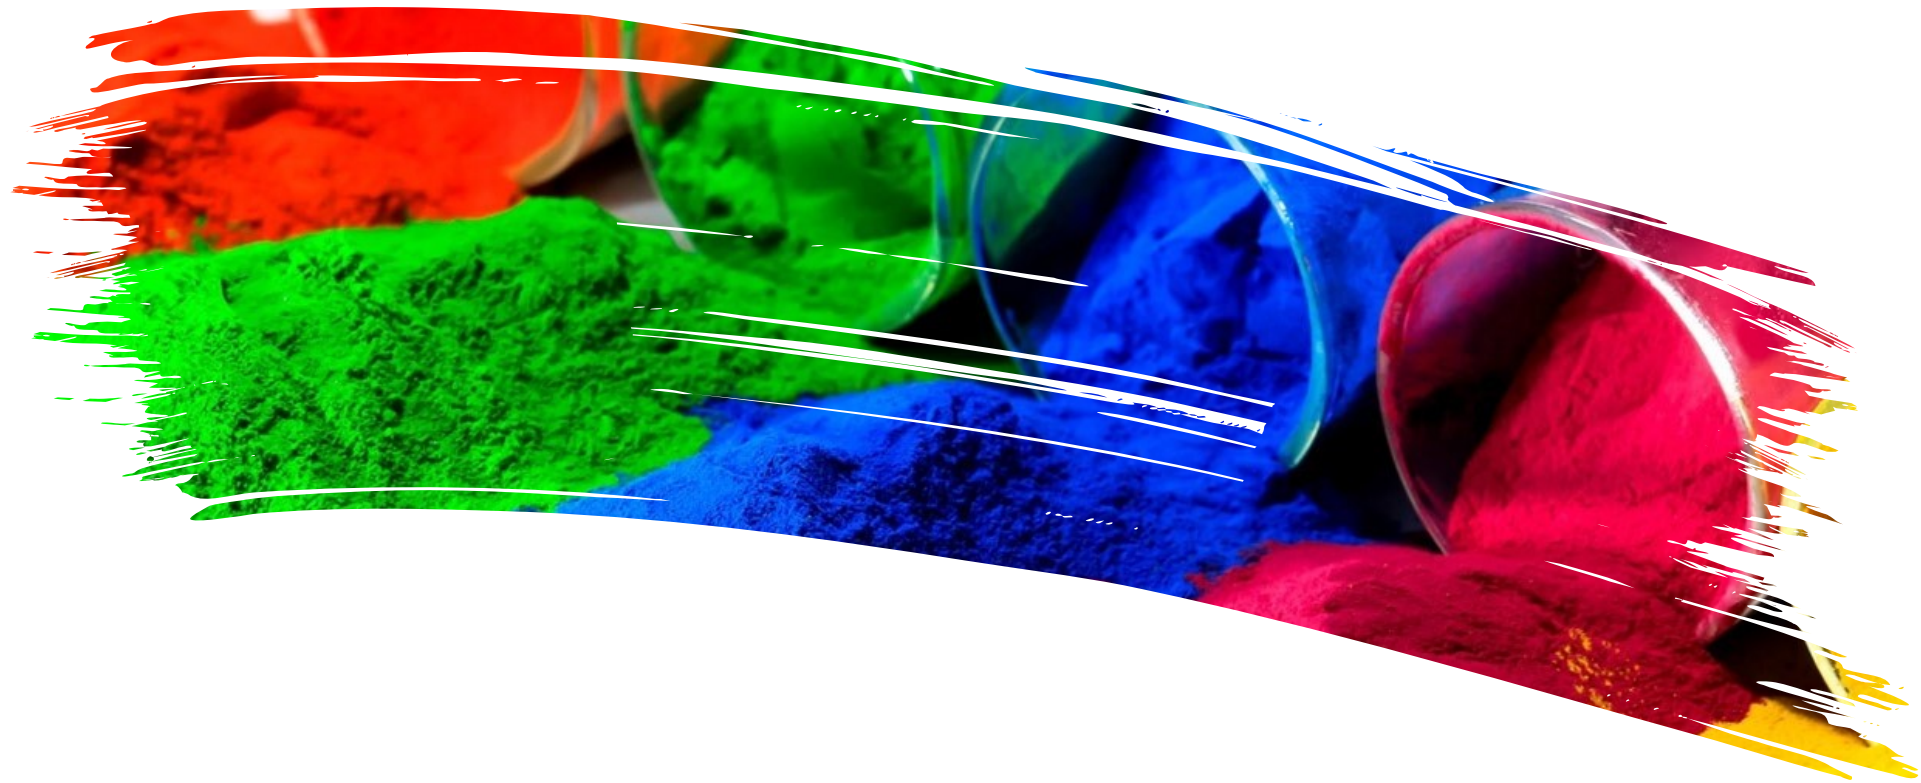

COATINGS - WATERPROOFING

- 100% solid, pure and hybrid **polyureas**.
- **Epoxy resins** for finishing parking lots, industrial warehouses, premises, cellars.
- Two-component **polyurethane elastomers**.
- One-component **polyurethane membranes**.
- **Polyester resins and fiberglass reinforcements**.
- **Acrylic waterproofing**.
- **Asphalt waterproofing**.
- Others: **epoxy primers, pigments and solvents**.

PAINT INDUSTRY

- **Emulsions, pigments, humectants, antifoams, dispersants, air release agents, solvents and other auxiliary products** used to formulate both decorative and protective coatings.

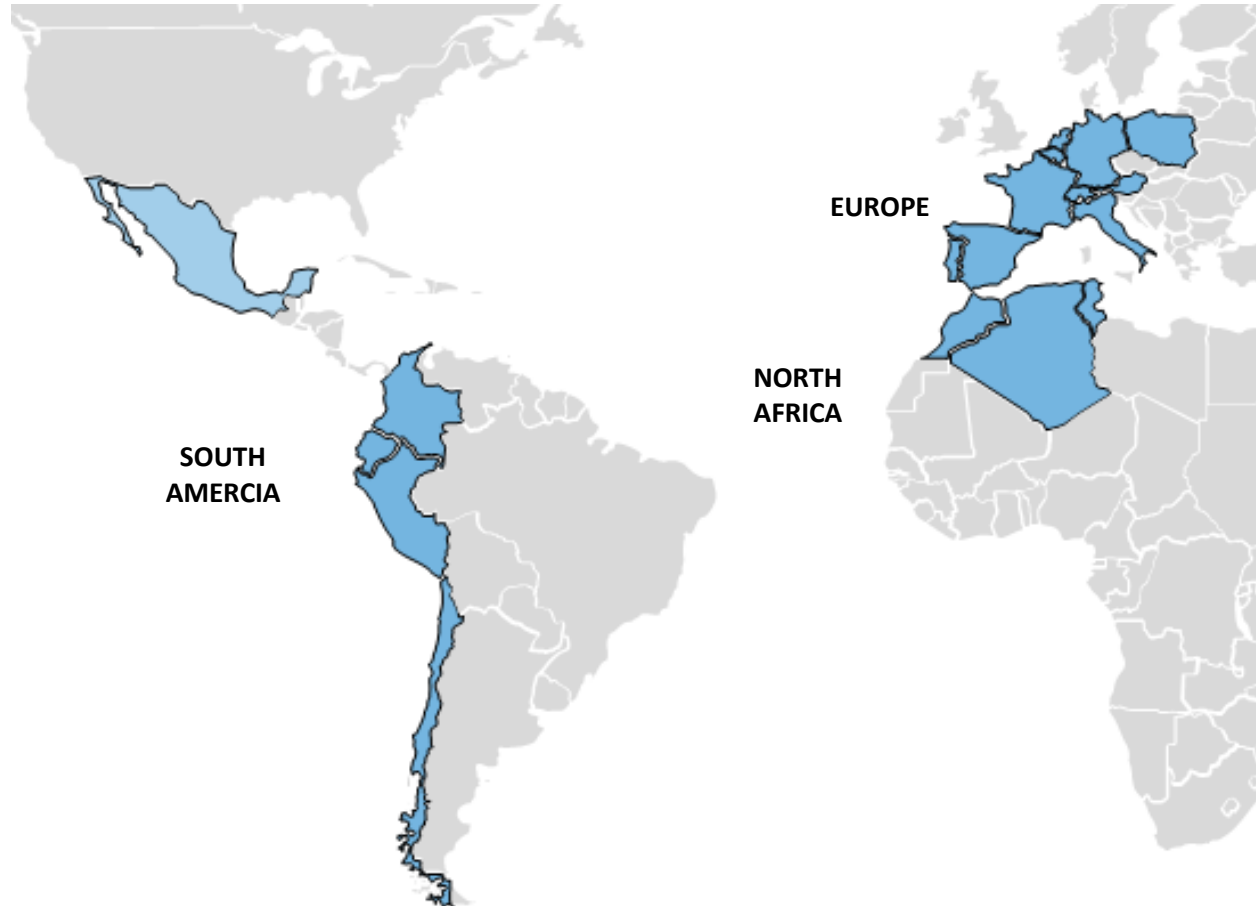

DETERGENCY - COSMETIC

- **Nonionic, anionic, cationic and amphoteric surfactants** used for the manufacture of hygiene and personal care products, as well as for the production of cleaning products for domestic and industrial use.
- **Others: scavengers, dispersants, solvents, solubilizers and functional additives.**
